URGENT

ADDENDUM #1

Regarding: BRANCH HILL GUINEA PIKE AT SR 28 IMPROVEMENTS  
PROJECT NUMBER MI-17-06  
Clermont County Transportation Improvement District

To All Bidders:

Please be advised that the following revisions/clarifications have been made to the Bid Package:

Revisions/Clarifications:

a. Bid Proposal currently reads as follows: "Additional notes on Maintenance of traffic and completion date: No road closures or restrictions to 1 way traffic shall be allowed between August 26, 2013 through June 2, 2014, Two-way traffic shall be maintained at all times during the above dates."

The above note is shown on the bid proposal form. The intent of this note is to start phase 1B after school is out in the summer of 2014 (June 2, 2014). After phase 1B (30 days), start phase 2 (30 days). During the fall of 2013 and through spring of 2014, the contractor can work on Phase 1A and installing utilities (storm sewer and watermain). It is intended that all Storm sewers and the watermain be installed prior to June 2, 2014. The installation of the storm sewers and watermain may require flagging operations. If flagging operations are required for more than 4 hours at a time, prior approval (5 days in advance) must be given by the engineer. No overnight closures will be allowed without prior approval. All plating must be recessed flush with existing pavement.

The installation of the watermain between stations 121+50 through stations 126+00 will require a closure of Branch Hill Guinea Pike. The closure to install the watermain between these stations must occur during the weekend (start closure 7pm Friday through 6am Monday). Two weeks notice is required to schedule the weekend closure. During watermain testing, the tie-in point must be plated.

b. Sidewalk repair. Existing sidewalks that need removed as a part of utility installation shall be considered incidental to the project. The installation of sidewalk to replace the removed sidewalk will be paid for under the unit price for bid item 33, 4" Concrete Walk.

c. Ref. No. 15, \*Private sign w/electric removed and reset. This pay item shall be removed from the bid proposal. The private owner is relocating this sign. Please cross out reference item 15 (do NOT provide a unit cost for this item).

d. Ref. No. 18, Headwall, as per plan. This headwall is detailed on sheet 44/49.

e. Tack coat has not been shown on the plans between the Asphalt base course and intermediate course. If the owner decides to add this, a unit cost will be negotiated during construction.

- f. Ref. No. 56, Pavement for maintaining traffic, Class B. The location and quantities for this line item are not specifically shown on the plans. It is anticipated that during construction, temporary pavement may be required in areas. This pay item shall be used "as directed" by the engineer.
  - g. All work zone pavement markings and signage shall be considered incidental to ref. no. 69, Maintenance of traffic, as per plan.
  - h. Ref. No's 97, 98 and 99 show Class 53 Ductile Iron Pipe. Please cross out 53 and write in 52 on your bid form. Watermains for these reference no's shall be Class 52 Ductile Iron Pipe.
- Please sign and return a copy of this letter by fax or mail to the Clermont County Engineer's Office prior to the revised bid opening at 2:00 P.M. local time on Thursday, July 25th, 2013 or with your bid documents at that time. Please complete the Bid Proposal, noting receipt of addendum.
